How to configure General Settings of plugin?

This is the main settings area. Configure all options as per your requirements. Like thumb size, button title, colors, style, size, file types to allow etc.

There are other tabs for advance settings, meta forms and others.

The screenshot shows the 'Basic Setting' tab of the File Manager Plugin's backend settings. The interface includes a sidebar with navigation links and a main content area with various configuration options.

How to view all files in admin:

This is the admin view area to view all files uploaded.

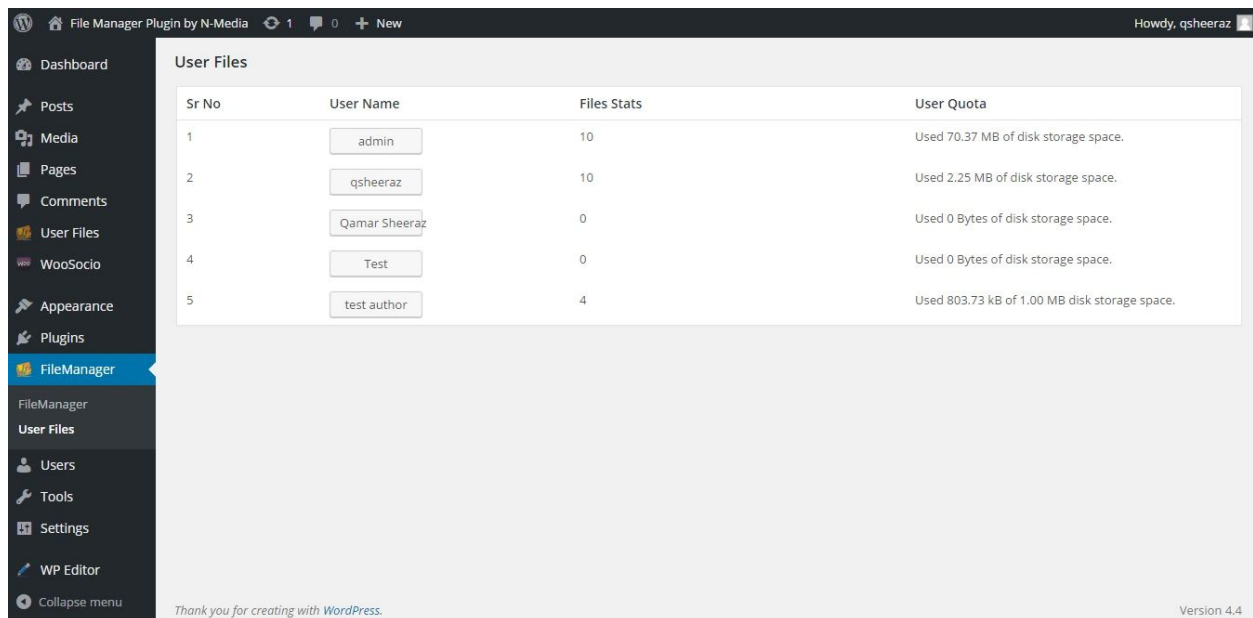

The screenshot shows the WordPress File Manager plugin interface. The left sidebar contains a menu with options: Dashboard, Posts, Media, Pages, Comments, User Files (highlighted), WooSocio, Appearance, Plugins, FileManager, Users, Tools, Settings, and WP Editor. The main content area is titled "User Files" and includes a search bar, a filter dropdown, and a table of files. The table has columns for Title, File_Groups, File owner, Download file, File Saved, and Date. The files listed are: oven, qs, yrdy, abc, and new test. Each file has a checkbox, a thumbnail image, and a download link.

Title	File_Groups	File owner	Download file	File Saved	Date
oven	—	qsheeraz		Local Server	Published 2015/12/31
qs	Home	qsheeraz		Local Server	Published 2015/12/16
yrdy	—	qsheeraz		Local Server	Published 2015/12/06
abc	—	qsheeraz		Local Server	Published 2015/12/06
new test	—	qsheeraz		Local Server	Published 2015/11/23

How to view user specific files in admin:

Here you can view files of a specific user.

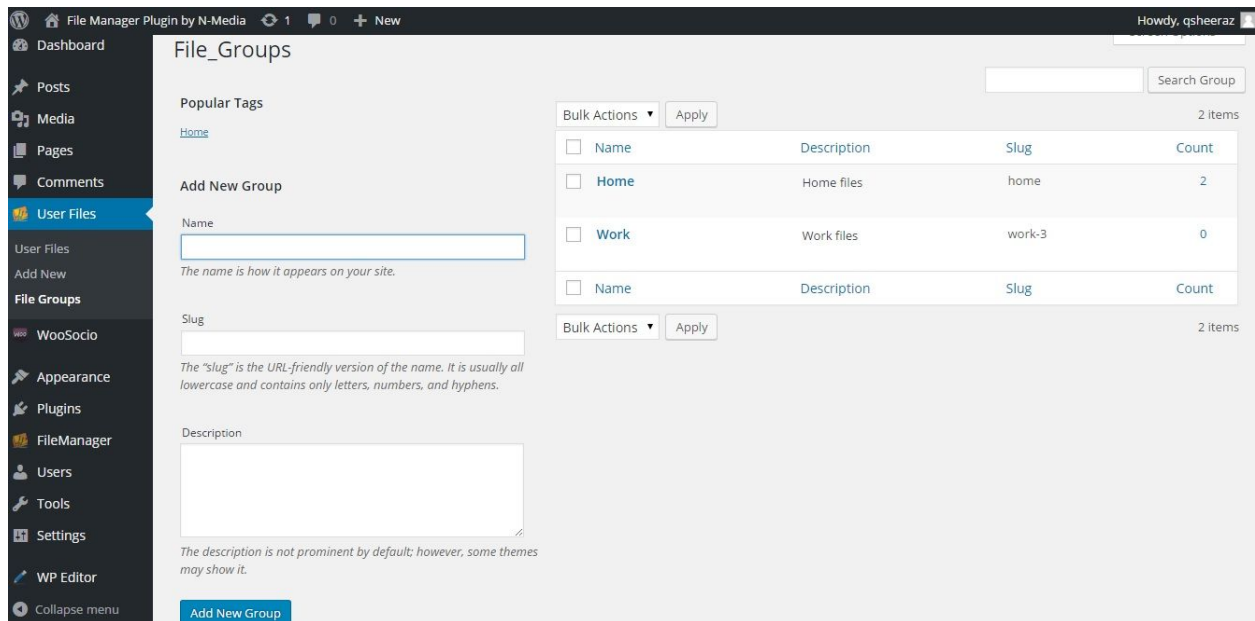

The screenshot shows the WordPress File Manager plugin interface. The left sidebar contains a menu with options: Dashboard, Posts, Media, Pages, Comments, User Files, WooSocio, Appearance, Plugins, FileManager, Users, Tools, Settings, and WP Editor. The main content area is titled "User Files" and includes a table of user-specific files. The table has columns for Sr No, User Name, Files Stats, and User Quota. The users listed are: admin, qsheeraz, Qamar Sheeraz, Test, and test author. Each user has a checkbox, a thumbnail image, and a download link.

Sr No	User Name	Files Stats	User Quota
1	admin	10	Used 70.37 MB of disk storage space.
2	qsheeraz	10	Used 2.25 MB of disk storage space.
3	Qamar Sheeraz	0	Used 0 Bytes of disk storage space.
4	Test	0	Used 0 Bytes of disk storage space.
5	test author	4	Used 803.73 kB of 1.00 MB disk storage space.

How to create file groups:

These files groups is used in Shortcode to share file within. Following shortcode with render an Upload Form and Files within Group ID. So different pages can be create with different groups:

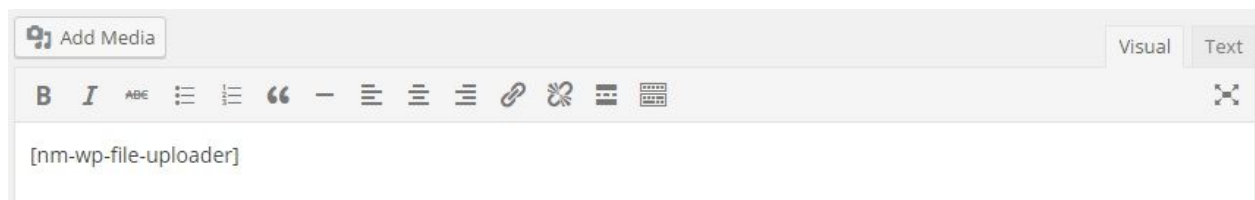

```
[nm-wp-file-uploader group_id="25,35"]
```

How to render Upload Form on Frontend?

Just use following shortcode in a page:

```
[nm-wp-file-uploader]
```

How allow users to only Download Files from a Group?

Now in version 8.3 Admin can create a Download pages where users (logged in) can download files only. For example if Admin want to create download area where:

- 1- only files belongs Students Group (ID:23) should display
- 2- only users having role: subscriber can access this download page

Then use following shortcode:

```
[nm-wp-file-downloader group_id="23" role="subscriber"]
```

How to make Download Page for Public Users

Now public download can be set using following shortcode. All files uploaded within Group can be downloaded by public users:

```
[nm-wp-file-downloader group_id="23" role="public"]
```

How to Upload Files through FTP?

Put files in the folder `wp-content/uploads/user_uploads/ user/ftp` through ftp. After putting files in user's folders, go to ftp upload tab from options panel and click on the button 'post FTP files'

You can also indicate user about ftp uploaded files in users listing by setting options available in option panel.
